

THE INNOVATORS OF COMFORT™

Introducing
the new fully adjustable
LegComfort™ system

Because legs come
in different lengths.

People come in all shapes and sizes. So do their legs. That's why Stressless® has developed LegComfort™ – the first automatic integrated footrest that adjusts to your own leg length. One moment it's elegantly hidden under the chair or sofa. Then, with a simple touch of a button on the side, it extends to the perfect position to offer your legs ergonomic comfort and support.

THE INNOVATORS OF COMFORT™

The electric LegComfort™ system is, of course, combined with the celebrated Stressless® Glide and Stressless® Plus™ systems. These work together to ensure your neck and lower back are perfectly supported in all positions, whilst the seat and back effortlessly follow your every movement.

The front of the footrest is angled for maximum relaxation, allowing the natural angle of your ankles in all positions.

The advantages of the LegComfort™ system

The footrest is hidden under the seat and then revealed through light pressure to the elegantly integrated buttons on the side of the seat.

The elegant, slim footrest design ensures full freedom of movement if you need to get out of the chair.

The footrest extends further down than almost all other footrests available, in order to suit all leg lengths.

Stressless® LegComfort™ – Frequently Asked Questions

How long does it take the LegComfort™ footrest to extend?

The LegComfort™ system takes less than 10 seconds to raise to the flat position, making it the fastest system in the market.

I have long legs – will the LegComfort™ be suitable for me?

The LegComfort™ system is fully adjustable for both short and long legs, so everyone can enjoy the comfort.

Can the LegComfort™ be added to the Signature or Star-Base Recliners?

Unfortunately not. The LegComfort™ is only available on the Classic base of all medium and large size recliner models.

Can a LegComfort™ seat be exchanged with a 'normal' seat for a Classic base at a later date?

Yes. All seats can be exchanged.

Is any assembly required with the LegComfort™?

No. Every Stressless® sofa and recliner will be delivered fully assembled.

How do you operate the LegComfort™ System?

The LegComfort™ system is operated by two touch buttons on the side of the seat (both chair and sofa). The front button extends the footrest and the rear button retracts the footrest.

What powers the LegComfort™ System?

The LegComfort™ system is powered via plug-in cord into the wall socket or by battery pack. Choose your preferred option at time of purchase.

What is the electrical current standard?

110/220 volts with the same transformer.

What is the battery charging time?

Recommended charging time for the initial charge is 24 hours. From that point on, the average charging time with normal use of the chair is only 6 hours.

How often does the battery need to be charged?

This will vary dependent on use. For example: if the mechanism is used on average 2-3 times per day, it will need to be charged every 3-4 weeks.

How is the battery delivered?

If your Stressless® furniture was ordered with a battery, it will be fitted at the factory. We also have a kit for assembly if it is to be added later.

What are the warranty details?

There is a 10-year warranty on the internal mechanism on all Stressless® chairs and sofas.

The LegComfort™ system will have the following warranty:

- 5 years on mechanical parts and motor.
- 2 years on the battery.

What is the maximum weight that can be applied to the LegComfort™ footboard?

No more than 10kg should be applied to the footboard at any time.

Availability

The LegComfort™ system is available on all **medium** and **large** Stressless® **Classic** base chairs. It is also available on the Stressless® Breeze sofa collection.

Stressless® LegComfort™ – faster, longer and more adaptive.
